

Release 2.0 - Excel import

In this release, you will mainly discover:

- The [Excel Import](#),
- The [Global limit](#).

Price change

We're increasing the price of Requirement Yogi, for 3 reasons:

- Requirement Yogi was initially priced at 25% of Confluence, but we haven't increased after the price bump last year, as opposed to most plugins,
- We are releasing the version 2.0 with a new valuable feature (Excel imports),
- We need funding to work on the Data Center certification, which will benefit everyone since the performance will improve for all users.

Tier	Confluence Server			Data Center	
	Confluence	RY - 2018	RY - 2019	Confluence DC	Requirement Yogi DC
10 Users	\$10	\$10	\$10	-	-
25 Users	\$1900	\$260	\$400	-	-
50 Users	\$3500	\$500	\$900	-	-
100 Users	\$6400	\$900	\$1600	-	-
250 Users	\$12,400	\$1800	\$3100	-	-
500 Users	\$19,300	\$2500	\$4850	\$12,000	\$4,850
1000 Users	-	-	-	\$24,000	\$6,000
2000 Users	\$22,800	\$3500	\$5700	\$48,000	\$12,000
10.000 Users	\$29,100	\$4500	\$7500	\$130,000	\$24,000
15.000 Users				\$140,000	\$25,000
20.000 Users				\$150,000	\$26,000
25,000 Users				\$160,000	\$27,000
Unlimited	\$35,400	\$5500	\$9000		\$29,000

Grandfathering - We keep the same price for existing customers

Confluence Server customers who have bought the product for the first time before 30/05/2019 can benefit from the old price until 30/05/2020. Please ask our support for a voucher, using the name of your company, and we will provide it.

Notes for administrators

We've worked on the reindexing algorithm

If you notice a change of performance, please notify us. We've ran the tests (see [Performance](#)) and reach the same results, varying depending on the quantity of changed requirements, so we're confident we're not impacting your servers negatively. However, it may always happen that we underestimate some scenarios, so please tell us about any issue.

We aim at obtaining the Data Center certifications, so the performance will keep improving in the following months. See [Data Center strategy for Requirement Yogi](#).

Global limit

It is now possible to set a global limit which is used everywhere. The default is 12,000 requirements in any batch, 2,000 by default in the UI, and 4,000 for import. See [Global limit](#) if you are interested.

We haven't implemented the global limit yet on the Coverage and Dependency matrix.

Excel import

We've introduced the Excel tab, to import requirements from Excel files.

- It is possible to disable the Excel import entirely,
- It is possible to limit the number of requirements per file.

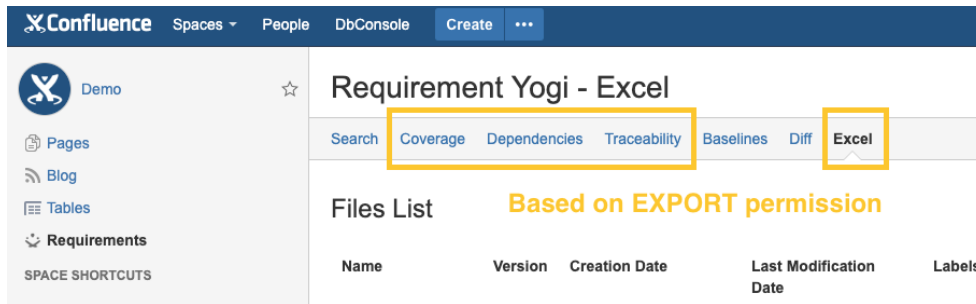

See [Excel Import](#) if you are interested.

Permissions

We plan to change the permissions.

We used to rely on the EXPORT permission of the space, to determine the visibility of the Coverage, Dependencies, Traceability and Excel tabs. At the time we chose the "Export" permission, although the name doesn't fit, because it matches the performance profile of the export: Those features require a lot of processing or I/O power, and exporting a space also requires a lot of power.

Since we've implemented the [Global limit](#), we believe there is no reason to require this permission anymore, since we've found a way to limit the impact of those features on other users. We plan to drop this permission in the next release.

Be prepared, in an upcoming release, to have those tabs appear for all users.

Changes in the Test & Compliance module

- None,
- To be exact, a spelling mistake was corrected, and a deprecated method was replaced with the most recent version,
- We've just published the module so customers have consistent version numbers, but it is not necessary to upgrade.

Changes in the RY for Jira module

- Reload the issue dynamically (after editing the links),
- Fix an error when the user wasn't privileged and wanted to edit the links (RY-276 and RY-377).

List of Jira issues

Key	Summary	T	Status	Resolution
RY-389	Jira: Reload the issue dynamically	+	CLOSED	Resolved
RY-327	The "awesome paste" should also work on simple search queries	+	CLOSED	Resolved
RY-324	Display tip when user tries to rename keys which are in an "include" macro	+	CLOSED	Resolved
RY-315	Restify actions	+	CLOSED	Resolved
RY-311	Global limit	+	CLOSED	Resolved
RY-310	Change permissions for baseline deletion: Only space admins can delete a baseline	+	CLOSED	Resolved
RY-309	Insert a RY report macro as static content	+	CLOSED	Resolved
RY-285	Include a diff on a page	+	CLOSED	Resolved
RY-281	Prevent reuse of deleted keys	+	CLOSED	Resolved
RY-263	Ability to import requirements from Excel	+	CLOSED	Resolved
RY-251	Order the properties alphabetically	+	CLOSED	Resolved
RY-377	Jira: A normal user can't create links to Confluence	•	CLOSED	Resolved

RJ-352	NPE in ExcelExport.java:410		CLOSED	Resolved
RJ-351	We need to check a specific bug in IE		CLOSED	Resolved
RJ-337	Creating a deleted requirement is not working		CLOSED	Resolved
RJ-334	Incompatibility with the Elements Spreadsheet apps		CLOSED	Resolved
RJ-318	RJ does not re-create page link when old page version with requirement link is restored		CLOSED	Resolved
RJ-312	RJ Testing and Compliance: Every test result is saved, even though it has been overwritten		CLOSED	Resolved
RJ-304	Cancelling baseline creation wizard causes "Page Not Found" error		CLOSED	Resolved
RJ-301	Selecting a non-existing baseline on diff screen causes exception		CLOSED	Resolved
RJ-300	RJ allows creating baselines including old versions of requirements but fails during creation process		CLOSED	Resolved
